# Introduction

This book contains 200 high school physics problems from the regional rounds, national rounds, and the open competitions of the Estonian physics olympiads.

Each problem comes with a short hint for students who are stuck on problems but do not want to look at the solutions just yet. The topics have been sorted based on their topics and the level of difficulty. The difficulty is marked with up to five stars. To make the searching of problems easier, a prefix is attached before the problem numbers, “P” for problem statements, “H” for hints and “S” for solutions. For example, the statement of problem 133 is denoted with P133. Furthermore, the name of the author and the round are written next to the title of the problem alongside with a short abbreviation of the form P 1, G 1 etc, where the letters correspond to middle school and high school respectively. G 9 would for example stand for the ninth problem in the high school division.

# Problems

## Dynamics

- P1 ★** Author: Aigar Vaigu, national round, 2005, G 1
- P2 ★** Author: Tundmatu autor, open competition, 2007, G 1
- P3 Horse ★** Author: Valter Kiisk, regional round, 2007, G 1  
A boy who is sitting on a tree branch wants to drop onto a horse that happens to be galloping by right under the tree. The horse is moving at a speed of  $v = 10 \text{ m/s}$  and the branch is  $h = 3 \text{ m}$  higher than the saddle. What does the horizontal distance between the saddle and the branch have to be at the moment when the boy lets go of the branch?
- P4 ★** Author: Aigar Vaigu, regional round, 2010, G 1
- P5 ★** Author: Andreas Valdmann, regional round, 2011, G 1
- P6 ★** Author: Tundmatu autor, open competition, 2005, G 2
- P7 ★** Author: Tundmatu autor, open competition, 2006, G 3
- P8 ★** Author: Tundmatu autor, open competition, 2007, G 5
- P9 ★** Author: Tundmatu autor, open competition, 2008, G 2
- P10 ★** Author: Mihkel Kree, national round, 2008, G 1
- P11 ★** Author: Siim Ainsaar, national round, 2008, G 2
- P12 ★** Author: Mihkel Kree, regional round, 2009, G 2
- P13 ★** Author: Valter Kiisk, open competition, 2010, G 1
- P14 ★** Author: Valter Kiisk, national round, 2010, G 1

# Solutions

- S1 ★** Author: Aigar Vaigu, national round, 2005, G 1
- S2 ★** Author: Tundmatu autor, open competition, 2007, G 1
- S3 Horse ★** Author: Valter Kiisk, regional round, 2007, G 1  
The free fall time is  
$$t = \sqrt{\frac{2h}{g}} = \sqrt{\frac{2 \cdot 3}{9.81}} \approx 0.78 \text{ s}$$
  
The desired distance is thus  $s = vt = 10 \text{ m/s} \cdot 0.78 \text{ s} = 7.8 \text{ m}$ .
- S4 ★** Author: Aigar Vaigu, regional round, 2010, G 1
- S5 ★** Author: Andreas Valdmann, regional round, 2011, G 1
- S6 ★** Author: Tundmatu autor, open competition, 2005, G 2
- S7 ★** Author: Tundmatu autor, open competition, 2006, G 3
